

New Era IT is now a Certified Emerson Network Power Solutions Partner

New Era IT brings the assurance of mission critical continuity to you through its partnership with Emerson Network Power. As a Solutions partner, you can count on New Era IT to provide an integrated IT infrastructure solution to your server environment and facilities; including backup UPS, racks and enclosures, computer-room cooling and rack-based monitoring. With this partnership, you can rely on New Era IT to keep your education institute thriving.

	Power	Cooling	Performance Optimization	Racks & Enclosures
Room Applications Integrated Approach to Efficiency and High Availability for your Data Centre.	<p>Liebert NXL Enterprise-scale UPS Protection for your Medium and Large Data Centres</p> <p>Chloride Trinergy High Power Modular Scalable UPS with Three Dynamic Functioning Modes</p>	<p>Liebert PEX Efficiency and Reliability for High Availability Cooling</p>	<p>Trellis Dynamic Infrastructure Optimization Platform</p>	<p>Knurr Miracel Superior, German Engineered Rack Solution</p>
Row Applications Power, Cooling and Monitoring Expertise for Row by Row Applications in your Data Centre.	<p>Liebert APM Modular and Scalable UPS for your Critical Data Centre Applications</p>	<p>SmartAisle™ Data Centre Efficiency Management Platform</p>	<p>Services Reliability and Service Commitment to maintain Optimization in your Data Centre</p>	<p>Knurr Quickship Easy-to-Install Enclosure</p>
Rack Solutions Integrated Solutions for Power, Cooling and Performance Optimization in the Rack Level	<p>Liebert GXT3 True On-line Double Conversion UPS with 0.9 Power Factor</p>	<p>Liebert XD Efficient Precision Cooling for your High Density Data Centres</p> <p>Liebert CRV Intelligent Precision Cooling for your Data Centre Equipment</p>	<p>Liebert iCOM Controls Advanced Control and Monitoring Capabilities for Optimized Performance</p>	<p>Knurr E-Series Rack Innovative Enclosure System For Critical IT Equipment</p>
			<p>Liebert RDU Intelligent and Proactive Monitoring in the Rack Level</p>	

Optimizing Your IT Networks Thru Efficiency Without Compromise™

As economic and technology factors shape how tertiary institutes perform day to day operations, managers of critical infrastructure facilities see the imperative task of adapting to the demands of changing technologies. Data centre users, influencers and IT resellers today see the opportunity to leverage efficient technologies to meet these challenges, as well as energy efficiency as a way to lower operating expenses.

Emerson Network Power introduces its next generation ICT Infrastructure solutions. It is a response to the growing focus on energy efficiency, high heat density and availability with focus on latest technologies and solutions on power management and availability, precision cooling, intelligent monitoring and ways to improve efficiency in your IT environment. It aims to keep your institute running while operating with efficiency and saving on cost.

Next Generation ICT Infrastructure Solutions.

Just another reason why Emerson Network Power is the global leader in enabling Business-Critical Continuity.™
